SUMMARY

Self-taught Full Stack Developer with experience in building responsive, fast, and scalable web applications. Skilled in the MERN stack, RESTful APIs, and modern frontend frameworks like Next.js. A prolific hackathon participant with 10+ events and a strong portfolio of real-world projects. Passionate about remote work, clean UI/UX, and solving meaningful problems.

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, Sql

Tools & DevOps: Git, GitHub, Vercel, Netlify, Figma, Postman

Other: Responsive Design, Web Animation, SEO, Freelancing

PROJECTS

1. SwiftRide – Real-Time Ride Booking Platform

Stack: React, Node.js, Render

Built a scalable ride-booking web app with driver/passenger views, real-time Render integration, and Graphhopper Maps API.

2. SafeZone – Women Safety App

Stack: React Native, Expo

Mobile-first emergency alert system with live location sharing and trusted contact alerts with calling features like sos.

3. YouTube UI - Personal YT

Stack: React, YouTube API

Built a visually accurate clone of YouTube with API-powered search, video viewing, and responsive layout.
