SUMMARY

Software Engineer I and full-stack developer building practical web products with React, Next.js, Node.js, and Python. Experienced across product interfaces, back-end services, data workflows, developer tooling, AI agents, and technical delivery. Strong quality-focused mindset with experience leading delivery and turning requirements into maintainable software.

EXPERIENCE

Software Engineer I

SmotPro India Pvt. Ltd. | Bengaluru, India | Mar 2026 - Present

- Build and maintain software solutions that simplify workflows for clients and executive teams.
- Develop full-stack features across user interfaces, back-end services, and data workflows from requirements through release.

Technical Lead

Global Tech Software Solutions | Bengaluru, India | Jul 2025 - Mar 2026

- Led delivery of full-stack software solutions for client and executive workflows.
- Translated requirements into practical features, reviewed work, and helped unblock technical delivery.

Quality Analyst

Medopharm | Malur, India | Jun 2021 - Jul 2022

- Supported quality checks, documentation, record-keeping, and operational standards in a regulated pharmaceutical environment.

SELECTED PROJECTS

ESP32 Monitor

ESP32 | IoT | Embedded C/C++ | Sensors

Built an ESP32-based sensor monitoring project, connecting embedded hardware data to a lightweight monitoring interface and learning the device-to-UI workflow end to end.

Jarvis

Python | Node.js | LiveKit | Whisper | PostgreSQL | LLM agents

Built a proactive voice accountability agent with scheduled wake-up, check-in, and evening-review calls, speech recognition, text-to-speech, memory, and tool-oriented workflows.

CodeScroll VS Code Extension

TypeScript | VS Code Extension API | Hacker News API | Dev.to API

Built an editor-native developer-news extension with topic feeds, article reading, browser handoff, API de-duplication, and persisted bookmarks. Received positive feedback from Daily.dev CTO Ido Shamun about the project.

OPEN-SOURCE AND COMMUNITY WORK

Maintains and publishes public software projects on GitHub across full-stack web, AI agents, developer tooling, and IoT. Public work includes Jarvis, CodeScroll, Putt Together, Aasha, WebXray, and supporting experiments. GitHub profile: github.com/Manibharadwaj

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS, C/C++

Frontend: React.js, Next.js, Tailwind CSS, Phaser

Backend: Node.js, Express.js, Hono, REST APIs, WebSockets, Slack Bolt

Data and infrastructure: PostgreSQL, Supabase, Redis, Git, Docker

AI and tooling: LLM agents, MCP, LiveKit, Whisper, VS Code Extension API

EDUCATION

Bachelor of Computer Applications (BCA), Manav Rachna International Institute of Research & Studies | 2022 - 2025

Bachelor of Business Administration (BBA), The East Point College of Higher Education | 2022 - 2025
